Technical data

FEATURE	VALUE
Type	web-based software
Communication	Access via computer, the router's direct system or SIM card
Standards and approvals	Certification of the BSI security standards
Security	Firewall, encrypted data transmission
Logging	all switching commands are documented
Data storage	IBOMADE cloud
Functions	Map view, real-time alarms, logging, user roles

Frequently asked questions

Who can access the system?
Everyone authorized for the respective project, for example motorway maintenance or police. They can view the traffic technology and execute switching commands directly.

How secure is the software?
The software is certified to the BSI security standards and has a firewall and encrypted data transmission. All switching commands are documented.

Which access paths are possible?
Normal access via computer, the router's direct system or a SIM card – the access paths are redundant.

Where is the data stored?
The data is transferred to the IBOMADE cloud; the software was designed by IBOMADE itself.
