Technical data

FEATURE	VALUE
Resolution	VGA 620x480 pixels up to Full HD 1080p
Communication	FTP upload of the image data
Image capture	freely configurable
Night vision	optional
Integration	Traffic control centres; LVMS platform
Data sovereignty	with the operator, e.g. traffic control centre (parameters and data)
Operation	around the clock, in all weather conditions
Purposes	Traffic safety, research, customized solutions

Frequently asked questions

What resolution does the camera deliver?

The resolution ranges from VGA (620x480 pixels) to Full HD 1080p; image capture is freely configurable.

Are recordings possible at night?

Yes, optionally the cameras also deliver special night vision recordings.

How does the image data reach the operator?

The image data is uploaded via FTP, so all parties involved have access to it at any time.

Can the camera be integrated into a traffic control centre?

Yes. The cameras can be integrated directly into the customer's system, for example at traffic control centres, which then have sovereignty over parameters and data.
